YOUNG LIVES TRANSFORMED

Harnessing the power of mentoring through collective impact

Mentoring is one of a community's most powerful tools for elevating the behavior, academic performance and aspirations of youth. It harnesses precious volunteer time to achieve a measurable impact on the path of young lives.

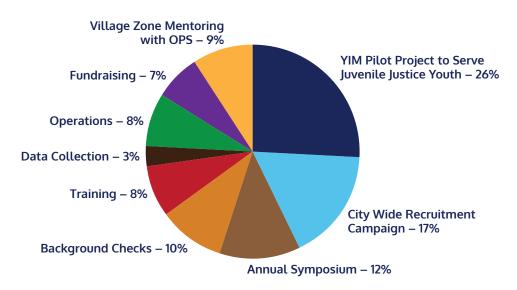

Through the Midlands Mentoring Partnership, our partner agencies are able to be more effective in serving youth and more efficient in utilizing donor contributions. We collaborate to identify best practices, collect and analyze data across agencies, and share tasks common to all to be more cost-effective.

Our mission of collective impact provides the essential infrastructure required by all mentoring agencies. By collaborating on common elements, our partner agencies are able to focus on their core missions; matching mentors to youth.
